

EU and UK REACH Compliance Statement

Prisma Colour Ltd is fully aware of the requirements of REACH, the EU Regulation on the Registration, Evaluation and Authorisation of Chemicals and currently complies with all EU REACH requirements (EC 1907/2006).

Following the Brexit transition period, the UK chemical regulation, UK REACH came into force on 1st January 2021. Prisma Colour intends to fully comply with all of the legal requirements for UK REACH to ensure a smooth transition with the minimum of disruption to our customers.

As a downstream user of chemicals, Prisma Colour is working closely with our suppliers to ensure that they, along with their own suppliers, complete the necessary formalities regarding the chemical substances they supply so that the products we make are EU and UK REACH compliant. This includes ongoing monitoring of notifications for all substances in its products, and the registration of these chemicals by the set deadlines.

Prisma Colour is committed to provide our customers with information about the chemical substances in our products according to both REACH regulations. Furthermore, Prisma Colour will notify customers if a substance of very high concern (SVHC) has been put on the EU and/or UK REACH Candidate List if it is present in one of its articles in concentrations above 0,1% (w/w). Any substance of high concern present will be stated on the material safety data sheet.

It is our intention to:

- Identify all substances within our products and ensure that our suppliers (manufacturers or distributors) pre-register/register these substances.
- Work closely with our supply chain in order to minimise and manage any potential risks associated with SVHC.
- We will communicate sufficient information to our suppliers in order to provide information on identified uses within the meaning of REACH.
- To follow instructions on Safety Data Sheets and information provided on exposure scenarios.
- Provide our customers with information regarding hazards, risks and safe conditions of use of our products through Material Safety Data Sheets.
